Petition to the House of Commons – #SaveWildSalmon

Whereas:

- The burden of proof that open net fish farms do not cause harm to wild salmon does not rest with the fish, it rests with government; and
- Canada's scientists have proven that diseased Atlantic farmed salmon in open-net pens in the Pacific ocean are threatening the health of wild salmon; and
- Canada, British Columbia in particular, is well positioned to become a world leader in closed containment salmon aquaculture; and
- Canada needs to invest in a safe, sustainable industry that protects pacific wild salmon, maintains employment, develops new technologies, jobs, and export opportunities.

We, the undersigned, call upon the Government of Canada to:

Immediately transition this harmful industry to safe, land-based closed containment technology.
